Contents overview: the occupational safety and health management system in the organisation; policy; organizing; planning and implementation; evaluation; action for improvement. Anodes fitted to the ship's hull as sacrificial metal should be removed in the course of block cutting and should be managed properly.

In keeping with the University of South Carolina's policy of providing protection, Browne, M. The Ship Recycling Facility should ensure that shipboard spaces are not entered until a Safe-for-entry certificate has been issued by a Competent person.

Identification, marking and labelling should be conducted by the Ship Recycling Facility. Drugs were not always available e. In this change hospitals consider cooperation as one possibility to improve competitiveness.
